

The Doors of Annam Swing Open

Word has just come from French Indo-China bringing the good news that the province of Annam is open for the preaching of the Gospel. Up to this time missionary residence has been permitted only in one city, Tourane, and missionaries have been able to make regular visits to only two or three other towns or cities where there were a number of native Christians. Now, however, opportunity is being given to take the Gospel to the important centers in the entire province where 5,000,000 souls are living without the knowledge of Christ. This means that more new missionaries should be sent out to the field this year. Already one married couple and one single man are in France enroute to the field and another young couple are appointed to sail in June, D. V. Three additional married couples, deeply rooted in God, and well trained in the Word and in Christian service, should be sent as soon as possible. Pray for the work in the needy and fruitful field of French Indo-China, where last year over 1,600 new converts were baptized.
